

# Water Ionizer Golden Model

This is a luxurious Water Ionizer & Filter with a 7-color LCD display and self-cleaning functions. Its elegant appearance and rich functionality make it stand out against all other Water Ionizers. Fixed output of currency with power range from 90V to 260V.

The self-cleaning function works for 10 seconds after each use and has an extra-cleansing function for water-flow levels of 30-90L.

The LCD display has a filter longevity indicator which is activated when water flow reaches 3000-12000L. It can also be set manually according to different water qualities in different regions.

With baked titanium platinum electrolysis chamber and NSF fiber activated carbon filter, the quality of this Water Ionizer is surely guaranteed.

This Water Ionizer will bring healthy water to you and your family.

## **Ionization + Filtration**

First, this system filters out impurities through an activated carbon filter, then separates the the minerals dissolved in water (such as calcium, magnesium, sodium, potassium, hydrogen, and others) according to there electrical charges to generate two types of water - alkaline and acidic. Alkaline water is good for consumption and alkalizes the body. Acidic water has an astringent effect and can be used for other purposes. It also causes the water to assume a hexagonal shape that allows it to more easily enter our cells.

## **Uses for Alkaline Water**

- Drinking alkaline water hydrates the tissues and helps elimination.
- Slight alkaline or or neutral water can be used as purified water.
- It can improve the taste of certain foods, such as rice.
- Keeps vegetables fresh during cooking.
- It can remove orders from strong smelling foods, such as fish, and they will keep longer.
- It enhances the flavor of coffee and tea.

## **Uses for Acidic Water**

- Kills viruses and bacteria on contact making it a great vegetable wash.
- Good for healthy hair and skin.

## **Main Features**

- 7-color LCD displays PH, ORP, filter life, et cetera
- SMPS (Switch Model Power Supply)
- 126 level of PH fine-tuning
- Constant current and voltage output ensure increased stability in working performance
- Energy-saving design
- Easy filter replacement
- Elegant appearance and rich functionality
- Hydraulic Printing Surface with Anti-fouling treatment
- Automatic reverse cleaning
- Filter replacement indicator
- Platinum baked titanium electrode and ceramic Nano-ionic membrane
- American-made activated carbon filter with NSF approval
- PH: 3.5-11 (Reference value, differ from different water quality)
