

# The Power Zappicator

The magnetic field, created with the help of the signal of the VariZapper/VariGamma, penetrates all materials except metal containers. Bowls with muesli, soup or other fluid food can be put on the zappicator as well.

All food placed on the north pole side of the zappicator are exposed to its energizing effect.

Dr. Clark has found out and repeatedly points out in her books that grains and flakes stored in silos are taxed with fungus spores. In “The Cure for HIV and AIDS”, she describes the effect of a small oscillating North pole magnetic field, excited with 1000 Hz, on food.

The **Power Zappicator** is the next generation of the basic zappicator according to Dr. Hulda Clark, as described in “**The Cure for HIV/AIDS**”. The **Power Zappicator** is a professional unit in which the strength of the coils have been exactly matched to the output of the **VariZapper/VariGamma**. Zap all your groceries for 10 minutes before stowing them in the kitchen cupboard or refrigerator. If you must cut or prepare produce or fruit before using them, repeat zappication for another 10 minutes.

**The Power Zappicator, indispensable for a consequent application of the Clark protocol!!**
